**Together now, for a
healthy tomorrow**

Chemrade, responsible care

Chemrade offers a web-based software platform that enables companies to easily manage the registration and risk assessment of hazardous substances in the workplace. This platform ensures control over health risks within the company and can be used to demonstrate compliance with occupational safety and health regulations such as national OSH and EU REACH. Employees benefit from a safe working environment, management maintains oversight of compliance and risk management, and regulatory bodies see a company that meets the highest safety standards.

State-of-the-art | High level support | Best of Breed | SaaS

Chemrade supports companies in:

- Preparing a register of hazardous substances;
- Reliable substance data through managed substance database;
- Selecting/deriving appropriate occupational exposure limits (OELs);
- Automated quantitative risk assessments by validated exposure models: ECETOC-TRA, Stoffenmanager, Advanced REACH Tool;
- Interpretation and documentation of model estimates or measurement data;
- Setting up a plan of action for risk management measures;
- Creating risk-based Workplace Instruction Cards (WIC);
- Compliance with OSH and REACH regulations.

A collage of five images: top-left shows an airplane engine on a tarmac; top-right shows large industrial storage tanks; middle-left shows a worker in a lab coat and mask checking a clipboard; middle-right shows test tubes with green liquid; bottom shows a tractor spraying a field.

Get a grip on health risks

Through an up-to-date hazardous substances register, including the option of deriving limit values and automated risk assessments with validated calculation models (ECETOC-TRA, Stoffenmanager, and Advanded REACH Tool)

Clear employee communication

Clear and tailormade Workplace Instruction Cards (WICs) designed for company specific applications. Available on PC, mobile device or Enterprise systems.

Legislative compliance

The system supports compliance with national OSH, and with European REACH requirements (use compliance checks)

About Chemrade Software

We aim to prevent people in daily contact with hazardous substances becoming ill through their work. We believe organizations have an important role to play here, which is why we want to help them ensure that their employees work in a safe and controlled manner with hazardous substances. Based on this conviction we offer complete and yet intuitive software that allows organizations to achieve their in their own way.

Our software had been successfully used in more than 20 countries around the world.
